Profile

I turn manual operations into automated, integrated and measurable AI-powered workflows. 10+ years in operations and customer service, including Vivo, Caixa Econômica and Mondelēz. In recent years I started building the solutions: I created the quality monitoring of a regulated multi-brand operation from scratch, automated it with AI and brought automation, data and AI to the entire operation. With a postgraduate degree in Strategic People Management, I combine the technical side with change management, so automation gets adopted by the team, not just delivered.

Results

~~~10%~~ **90%+**
of conversations audited by AI (~2,700/month), freeing up ~35 h/week

~~47.5%~~ **75.2%**
CSAT of the main operation, with Justified CSAT above 85%

~60%
of conversations resolved by an AI agent, with no human

~~~7%~~ **10–11%**
of conversations rated by customers, above the 10% target

Experience

Level 3 Support Analyst · Automation and Systems Integration

Jan 2026 – Present

Ecomicro · Florianópolis, Brazil

- Brought automation, data and AI to the entire multi-brand customer service operation as the **team's technical reference**, working with Product and IT.
- **Unified data:** integrated conversations, cases, quality data, alerts, Reclame Aqui, spreadsheets and financial transactions, transformed with SQL in BigQuery and DAX in Power BI. Brand comparisons became instant, with one-click or automatic reports.
- **CORTEX:** built an in-house operations intelligence hub that unifies quality monitoring, cases, reviews, dashboards, tasks and AI costs, with monitored connectors and role-based access.
- **AI in customer service:** integrated Fin AI with the back office alongside the Product team (balance, withdrawals, deposits and transactions in real time) and managed the AI workflows, with ~60% of conversations resolved without a human.
- **Multi-agent audit:** triage, compliance, quality and fundamentals agents, a false-positive reviewer and a CSAT exemption judge, with continuous calibration and controlled cost.
- **Automated routines:** Jira and Confluence data joined with quality data via APIs, weekly per-agent e-mail reports, checklists, forms and critical alerts.
- 9 automations in production with idempotency, execution logs, failure handling, monitoring and anonymized data.

Level 2 Support Analyst · Data Analysis and Quality Monitoring

Apr 2025 – Dec 2025

Ecomicro · Florianópolis, Brazil

- Created, optimized and automated **Quality Assurance (QA) monitoring** in a regulated multi-brand operation handling more than 3,000 conversations per month.
- Built the infraction matrix by severity and the scoring model from scratch, with standardized feedback and a formal dispute process.

- Connected the Intercom REST API to n8n: transcripts audited by an LLM in daily batches, comparing each conversation with internal procedures. Coverage went from ~10% to **90%+**, freeing up **~35 h/week**.
- Automatic reports with a development plan per agent and critical-case alerts for management. Created **Justified CSAT**, which excludes ratings caused by factors outside the agent's control.
- Coached ~10 agents through 1:1 feedback and turned findings into root-cause cases for Product, Legal, Compliance and Finance.

Level 1 Support Analyst

Mar 2024 – Mar 2025

Ecomicro · Florianópolis, Brazil

- Specialized support in a regulated operation, focused on financial requests and KYC. Mapped the bottlenecks that later fed my automations.

Digital Customer Service and Operations Analyst

Oct 2020 – Dec 2023

Vivo (Telefônica Brasil) · Curitiba · omnichannel, regulatory cases, Salesforce, SAP and TOTVS

Receptionist and Administrative Assistant

Dec 2014 – Aug 2020

Caixa Econômica Federal and Mondelēz International · Curitiba

Reference projects

Enterprise Operational Intelligence Hub · hub that unifies KPIs, quality, cases and AI costs	View on GitHub
AI Support Intelligence · customer service audit with LLMs, scoring and alerts	View on GitHub
Automation Control Tower · monitoring of runs, failures, logs and alerts	View on GitHub
Finance Intelligence · financial consolidation, reconciliation and reports	View on GitHub
LeadFlow AI · AI-powered lead capture and qualification	View on GitHub

Skills

Automation and integration
n8n, Make, REST APIs, Webhooks

Data and BI
SQL, BigQuery, Python, Power BI, DAX

Applied AI
OpenAI API, Claude, Intercom Fin, AI agents, prompt engineering

Management
Jira, Confluence, SLAs, process documentation, people management

> I build idempotent workflows with no duplicate records, execution logs, failure handling, monitoring and anonymized sensitive data.

Education and languages

Systems Analysis and Development
UNINTER · in progress

Postgraduate degree in Strategic People Management
UNINTER · 2022

Languages
Portuguese (native) · English (professional)

Certifications

Integrations: APIs & Connected Workflows · n8n Academy, 2026

Atlassian Agile Project Management Professional Certificate · Atlassian, 2026

Intercom Certified: conversational framework for support teams · Intercom Academy, 2024

Jira Fundamentals Badge · Atlassian University, 2024

Confluence Fundamentals Badge · Atlassian University, 2024

Career Essentials in Data Analysis · Microsoft and LinkedIn, 2024
